1. Introduction

1.1 Problem Specification

Sithma Driving School currently operates across three branches Maharagama, Werahara, and Delgoda and manages its entire operation manually. At present, the school does not use any dedicated software system; student registrations, lesson bookings, license progress, and payment records are all maintained using paper-based records and informal, phone-based communication between students, instructors, and office staff.

At each branch, a Data Entry Officer/Staff member is responsible for registering students, manually recording dates received from the Department of Motor Traffic (DMT) such as medical examination, learner's registration, and learner's exam dates verifying payment slips, and managing lesson bookings, all without any centralized system to support these tasks.

This manual approach creates several significant problems:

- **Fragmented, inconsistent records** - student information, DMT dates, and payment records are kept separately at each branch, with no consolidated or real-time view of a student's overall progress.
- **High risk of missed regulatory deadlines** - because a student must pass the Trial (practical driving test) within 1.5 years of passing the learner's exam, and is limited to a maximum of 3 Trial attempts, any date that is missed, delayed, or incorrectly recorded manually can cause a student to lose an attempt or miss their licensing window entirely.
- **Manual, error-prone payment verification** - payments are made outside the system (e.g., bank transfer), and staff must manually cross-check uploaded/physical payment slips against bookings, which is slow and susceptible to human error.

- **No self-service access for students** - students have no way to check their own registration status, DMT dates, remaining lessons, or package details without directly contacting staff, creating unnecessary dependency and communication overhead.
- **No structured exam preparation tool** - students preparing for the DMT written exam have no formal, school-provided practice resource and must rely on external materials.
- **Administrative overload** - a single Data Entry Officer per branch is responsible for registration, date tracking, payment verification, and booking management, creating a bottleneck as student volume grows.

Together, these issues limit Sithma Driving School's ability to scale, increase the risk of compliance failures with DMT timelines, and result in a poor, opaque experience for students who have no visibility into their own progress.

1.2 Business idea

The core idea is to replace Sithma Driving School's fully manual, paper-based operation with a single, centralized Sithma Driving School Management System. A digital platform that brings student registration, DMT milestone and Trial tracking, vehicle package and lesson management, time-slot booking, payment verification, notifications, and exam practice together in one place, accessible to students, staff, and instructors across all three branches.

For the business, this creates real, tangible value. It removes the administrative bottleneck currently placed on a single Data Entry Officer per branch by automating record-keeping, date tracking, and payment cross-checking. It significantly reduces the risk of a student missing a critical DMT deadline (such as the 1.5-year Trial window or the 3-attempt limit) by tracking these rules automatically instead of relying on manual memory and paperwork. It gives branch and school management a consolidated, real-time view of operations - registrations, bookings, payments, and student progress - across all three branches for the first time, something that is simply not possible today. And for students, it turns a slow, staff-dependent process into a transparent, self-service experience: they can check their own dates, remaining lessons, and package status anytime, receive automatic notifications the moment something changes, and prepare for their DMT written exam through a built-in multilingual quiz module. In short, this system is the digital backbone that lets Sithma Driving School scale its operations, reduce compliance risk, and deliver a modern, trustworthy experience - something a manual, three-branch paper system cannot support as the business grows.

1.3 Solution Outline

The proposed solution is a centralized, web and mobile-accessible Sithma Driving School Management System built around the four core Epics identified for this project: (1) **Student Registration, DMT Milestone Tracking, Student/Staff Profile & Vehicle Package Management** - capturing Type 1/Type 2 student registrations, tracking DMT medical/registration/exam/trial dates, managing profiles, and handling package selection (Car, Bike, Three-Wheeler, Heavy Vehicle); (2) **Lesson & Time-Slot Management** - allowing staff to manage branch/instructor availability and students to book lesson slots and free weekly theory/practical classes; (3) **Payment Management & Verification** - where students upload payment slips for staff to manually verify, paired with an in-app notification service that alerts students and staff whenever a registration, date, or payment status changes; and (4) **Exam Management** - a multilingual (Sinhala, Tamil, English) quiz module covering both Light and Heavy Vehicle question sets, with answers and marks handled directly through the system.

The system will be built using a **React** front end, a **Node.js/Express** REST API back end, and a **MySQL** database, deployed on a cloud-hosted platform accessible to students, staff, and instructors across all three branches. The high-level architecture is shown below.

1.4 Key Benefits

- **Time saved:** -

Registration, DMT date tracking, lesson booking, and payment checks all happen in one centralized system instead of being handled manually across three separate branches, cutting down significantly on administrative time per student.

- **Cost reduction:** -

Automating record-keeping and payment verification reduces the staffing overhead currently needed to manage paper-based processes, allowing the same office staff to support a larger number of students without additional hires.

- **Error reduction:** -

Automated enforcement of the 3-Trial-attempt limit and the 1.5-year Trial deadline removes the risk of human error in manually tracking these DMT rules, reducing the chance of a student losing an attempt or missing their licensing window due to a missed or miscalculated date.

- **Fewer missed communications:** -

Automatic in-app notifications ensure students and staff are informed the moment a registration, DMT date, or payment status changes, removing dependency on staff remembering to call or message students.

- **Better decision-making via reports:** -

Branch and school management gain a consolidated, real-time view of registrations, bookings, payments, and student progress across all three branches - visibility that does not exist today - supporting more informed decisions on staffing, scheduling, and package pricing.

- **Scalability:** -

A centralized digital system allows Sithma Driving School to handle more students and more course types (Light and Heavy Vehicle, refresher, standalone lessons) without a proportional increase in administrative effort, supporting business growth.

- **Improved customer (student) experience:** -

Students gain self-service visibility into their own registration status, DMT dates, remaining lessons, and package details at any time, plus access to multilingual

(Sinhala/Tamil/English) exam practice - replacing a slow, staff-dependent process with a transparent, modern experience.

- **Faster, more reliable payment verification:** -

A structured slip-upload and staff-verification workflow replaces informal, ad-hoc bank-transfer cross-checking, speeding up payment confirmation and reducing disputes.

- **Consistency across branches:** -

All three branches (Maharagama, Werahara, Delgoda) operate on the same system and rules, ensuring students receive a consistent experience and staff apply DMT timeline rules uniformly.

2. Objectives

2.1 Main Objective

To design and develop, within the 15-week project timeline, a centralized web-based management system for Sithma Driving School that digitizes student registration, DMT milestone and Trial tracking, lesson and time-slot booking, payment verification, and multilingual exam management across all three branches, replacing the current fully manual, paper-based process

(This is written as a SMART objective — **Specific** (names the exact system and its four core functions), **Measurable** (a working system covering registration, DMT tracking, booking, payment, and exam management), **Achievable** (scoped to what the team can realistically build), **Relevant** (directly addresses the problems identified in 1.1), and **Time-bound** (within the 15-week project timeline).)

2.2. Sub Objectives

- To implement a **Student Registration, DMT Milestone Tracking, and Profile & Vehicle Package Management** module that supports both Type 1 (new learner) and Type 2 (trial-ready) student categories, tracks medical/registration/exam/Trial dates, and automatically enforces the 3-attempt and 1.5-year Trial rules, by the end of the development phase.
- To implement a **Lesson & Time-Slot Management** module that allows staff to manage branch and instructor availability and allows students to book lesson slots across Light Vehicle (Car, Bike, Three-Wheeler) and Heavy Vehicle (Bus) categories, as well as free weekly theory/practical classes, within the project's development sprints.
- To implement a **Payment Management & Verification** module, including in-app notifications, that allows students to upload payment slips and staff to manually verify them against bookings, reducing payment confirmation time and communication delays.
- To implement a multilingual (Sinhala, Tamil, English) **Exam Management** module offering quiz-style practice questions for both Light and Heavy Vehicle DMT written exams, with marks handled directly through the system, to give students a structured, self-service exam preparation tool.

3. Stakeholder Identification

Stakeholder	Type (Primary / Secondary / Tertiary)	Interest / Concern
Student (Type 1 — New Learner)	Primary	Wants a simple way to register, track DMT dates, and progress toward the learner's exam and Trial stage.
Student (Type 2 — Trial-Ready)	Primary	Wants to register directly for Trial lessons and book Trial dates efficiently.
Data Entry / Office Officer	Primary	Needs an efficient way to register students, update DMT dates, verify payments, and manage bookings — currently the most burdened role in the manual process.
Branch / School Management (Owner)	Primary	Wants consolidated visibility across all three branches, control over pricing and resourcing, and a system that supports business growth.
Instructor	Secondary	Needs an accurate profile and lesson schedule; concerned with session structure, time-slot allocation, and workload feasibility.
Development / IT Team	Secondary	Responsible for designing, building, and delivering the system to meet functional requirements and project deadlines.
Department of Motor Traffic (DMT)	Tertiary	External regulator; does not use the system directly, but all Trial/exam timeline rules built into the system must comply with DMT regulations.

4. Procedure

ISPM Project Timeline — Gantt Chart (15-Week Semester)

5. Product Vision Statement

For → Sithma Driving School's students, instructors, and office staff across all three branches,

Who → currently rely on a fully manual, paper-based process to manage registrations, track licensing progress, book lessons, and confirm payments,

The product → Sithma Driving School Management System is a centralized digital platform,

Provides → A single, transparent, and reliable way for students and staff to manage the entire driving-license journey - from registration through to licensing — reducing administrative burden, minimizing missed regulatory deadlines, and giving everyone real-time visibility into progress.

6. Epics

Epic ID	Epic Description
EPIC-01	Student Registration, DMT Milestone Tracking & Profile/Package Management – Register students (Type 1 – new learner, Type 2 – trial-ready), track DMT-issued milestone dates (medical, learner registration, exam, trial), and manage student, staff, and vehicle package/pricing profiles.
EPIC-02	Lesson and Time Slot Management – Enable students to book lesson time slots across branches, and allow staff/instructors to manage available sessions and schedules.
EPIC-03	Payment Management and Verification (Notifications Management) – Allow students to upload payment slips for staff verification, and send in-app notifications to students and staff for registrations, dates, and payment updates.

7. User Stories

Epic ID	User Story ID	User Story	Stakeholder
EPIC-01	US-01	As a student, I want to register as a Type 1 (new learner) student, so that I can start the DMT learner process through Sithma.	Student
EPIC-01	US-02	As a student, I want to register as a Type 2 (trial-ready) student, so that I can directly book Trial lessons.	Student
EPIC-01	US-03	As a data entry officer, I want to register a new student's profile, so that their details are stored in the system.	Data Entry Officer
EPIC-01	US-04	As a student, I want to update my DMT medical exam date, so that staff and I both know my current schedule.	Student
EPIC-01	US-05	As a data entry officer, I want to update a student's DMT learner registration date, so that the student's progress is accurately tracked.	Data Entry Officer
EPIC-01	US-06	As a data entry officer, I want to update a student's Trial exam date, so that their license progression is up to date.	Data Entry Officer
EPIC-01	US-07	As a student, I want to view my DMT milestone timeline (medical, registration, exam, trial dates), so that I know what stage I'm at.	Student
EPIC-01	US-08	As a staff member, I want to view a student's full milestone history, so that I can advise them on next steps.	Data Entry Officer
EPIC-01	US-09	As a student, I want to be marked eligible for Trial lessons only after passing my learner's exam, so that I follow the correct DMT process.	Student
EPIC-01	US-10	As a student, I want the system to track my remaining Trial attempts (max 3), so that I know how many chances I have left.	Student

EPIC-01	US-11	As a student, I want the system to check my 1.5-year Trial deadline from my learner exam pass date, so that I don't miss my license window.	Student
EPIC-01	US-12	As a student, I want to be verified for Heavy Vehicle eligibility (2+ years on a Light Vehicle license), so that I can register for the Bus package.	Student
EPIC-01	US-13	As a data entry officer, I want to manage vehicle categories and course packages (Car, Refresher, Bike, Three-Wheeler, Heavy Vehicle), so that pricing and lesson counts stay accurate.	Data Entry Officer
EPIC-01	US-14	As a student, I want to select a course package and vehicle type at registration, so that my lessons and pricing are set up correctly.	Student
EPIC-01	US-15	As a staff member, I want to view instructor profiles per branch, so that I can assign them to sessions.	Data Entry Officer
EPIC-02	US-16	As a student, I want to view available lesson time slots at my branch, so that I can choose a convenient time.	Student
EPIC-02	US-17	As a student, I want to book a lesson slot for my chosen vehicle type, so that I can attend my driving lessons.	Student
EPIC-02	US-18	As a student, I want to view my upcoming lesson schedule, so that I know when and where my next lesson is.	Student
EPIC-02	US-19	As a data entry officer, I want to adjust available time slots at a branch, so that scheduling reflects real instructor/vehicle availability.	Data Entry Officer
EPIC-02	US-20	As a data entry officer, I want to assign an instructor to a lesson session, so that each booked slot has a confirmed instructor.	Data Entry Officer
EPIC-02	US-21	As an instructor, I want to view my assigned lesson sessions, so that I know which students I'm teaching and when.	Instructor
EPIC-02	US-22	As a student, I want to book a free weekly theory or practical class, so that I can attend at no extra charge.	Student
EPIC-02	US-23	As a student, I want to request additional lessons beyond my package, so that I can get more practice if needed.	Student
EPIC-02	US-24	As a data entry officer, I want to view all lesson bookings across branches, so that I can manage overall scheduling.	Data Entry Officer
EPIC-03	US-25	As a student, I want to upload a photo/scan of my payment slip, so that staff can verify my payment.	Student
EPIC-03	US-26	As a data entry officer, I want to review and manually verify uploaded payment slips, so that payments are confirmed accurately.	Data Entry Officer
EPIC-03	US-27	As a student, I want to view my payment status (pending/confirmed), so that I know if my registration is finalized.	Student

EPIC-03	US-28	As a student, I want to view my remaining lessons and package balance, so that I can track what I've used and what's left.	Student
EPIC-03	US-29	As a student, I want to receive an in-app notification when a registration, medical, exam, or trial date is set or updated, so that I stay informed without checking manually.	Student
EPIC-03	US-30	As a data entry officer, I want to receive an in-app notification when a student uploads a payment slip, so that I can verify it promptly.	Data Entry Officer
EPIC-03	US-31	As a student, I want to receive a notification once my payment is verified, so that I know my booking is confirmed.	Student
EPIC-04	US-32	As a student, I want to select my preferred language (Sinhala, Tamil, or English) for the practice quiz, so that I can study comfortably.	Student
EPIC-04	US-33	As a student, I want to attempt practice quiz questions similar to the DMT written exam, so that I can prepare for my actual exam.	Student
EPIC-04	US-34	As a student, I want to choose quiz questions relevant to Light or Heavy Vehicle categories, so that I practice the right content for my license type.	Student
EPIC-04	US-35	As a student, I want to view my quiz marks after attempting a paper, so that I can track my preparation progress.	Student
EPIC-04	US-36	As a data entry officer, I want to manage/update the exam question bank, so that quiz content stays current and accurate.	Data Entry Officer

8. Initial Product Backlog

EPIC-01: Student Registration, DMT Milestone Tracking & Profile/Package Management

User Story ID	Remarks	Estimated Story Points	Estimated Hours	Priority
US-01	Core registration flow for Type 1 students	5	16	High
US-02	Core registration flow for Type 2 students	5	16	High

US-03	Foundational — needed before any other feature works	5	16	High
US-13	Packages/pricing must exist before registration can use them	5	16	High
US-14	Depends on US-13 being complete	5	12	High
US-09	Core business rule gating Trial eligibility	5	12	High
US-04	Simple date update field	3	8	High
US-05	Simple date update field	3	8	High
US-06	Simple date update field	3	8	High
US-10	Business logic on top of trial date tracking	3	8	Medium
US-11	Business logic on top of milestone dates	3	8	Medium
US-12	Eligibility check for Heavy Vehicle upgrade	3	8	Medium
US-07	Read-only view, depends on US-04–06	3	8	Medium

EPIC-02: Lesson and Time Slot Management

User Story ID	Remarks	Est. Story Points	Est. Hours	Priority
US-17	Core booking transaction, most complex in this epic	8	20	High
US-16	Needed before booking can happen	5	12	High
US-19	Staff-side slot control, needed early	5	12	High
US-20	Needed to complete a valid booking	3	8	Medium
US-18	Read-only view, depends on US-17	3	8	Medium
US-21	Read-only view for instructors	3	8	Medium
US-23	Extends existing package, not core to MVP	3	8	Medium

US-22	Nice-to-have, not tied to paid packages	3	8	Low
US-24	Reporting/oversight view, not core to booking flow	3	8	Low

EPIC-03: Payment Management and Verification (Notifications Management)

User Story ID	Remarks	Est. Story Points	Est. Hours	Priority
US-17	Core booking transaction, most complex in this epic	8	20	High
US-16	Needed before booking can happen	5	12	High
US-19	Staff-side slot control, needed early	5	12	High
US-20	Needed to complete a valid booking	3	8	Medium
US-18	Read-only view, depends on US-17	3	8	Medium
US-21	Read-only view for instructors	3	8	Medium
US-23	Extends existing package, not core to MVP	3	8	Medium

EPIC-04: Exam Management

User Story ID	Remarks	Est. Story Points	Est. Hours	Priority
US-33	Core quiz-taking functionality	5	16	High
US-36	Content management needed before quiz can be used	5	12	Medium
US-34	Filtering logic on top of quiz base	3	8	Medium
US-32	Simple language selector	2	4	Medium
US-35	Depends on marks/scoring being added (flagged earlier as an enhancement beyond the source spec)	3	8	Low

9. Definition of Done (DoD)

A user story is considered "Done" when:

- The feature has been fully implemented according to the acceptance criteria of the user story.
- The code has been reviewed by at least one other team member (peer code review).
- The feature has been tested (unit/functional testing) and works without critical bugs.
- The UI (if applicable) is functional, responsive, and consistent with the rest of the system's design.
- The feature has been integrated into the main branch/build without breaking existing functionality.
- The feature has been tested on the intended platform/device without major issues.
- Relevant documentation (e.g., code comments, user guide notes) has been updated if needed.
- The feature has been demonstrated to and accepted by the team/supervisor (or Product Owner, if applicable).
- No known high-priority bugs remain open for that story.

Epic-Specific DoD (optional additions)

Epic	Additional DoD Criteria
EPIC-01 – Registration & DMT Milestone Tracking	Student registration data and DMT milestone dates are accurately saved and retrievable; eligibility rules (e.g., Trial access only after passing learner's exam) are enforced and tested.
EPIC-02 – Lesson and Time Slot Management	Booking a slot correctly updates availability in real time, with no double-booking possible for the same instructor/time/branch.
EPIC-03 – Payment Management & Notifications	Uploaded payment slips are stored securely and only marked "confirmed" after explicit staff verification; notifications are triggered correctly for all relevant events.
EPIC-04 – Exam Management	Quiz questions display correctly in all three languages (Sinhala, Tamil, English) with no missing translations, and questions are correctly filtered by vehicle category.

10.Sprint 1 Preview

11. EPIC-01: Student Registration, DMT Milestone Tracking & Profile/Package Management - 9 of 15 stories selected (60%)

User Story ID	User Story (short)	Story Points	Priority
US-01	Register Type 1 student	5	High
US-02	Register Type 2 student	5	High
US-03	Staff registers student profile	5	High
US-13	Manage vehicle categories & packages	5	High
US-14	Select package at registration	5	High
US-09	Trial eligibility gated by learner exam pass	5	High
US-04	Update medical exam date	3	High
US-05	Update learner registration date	3	High
US-06	Update Trial exam date	3	High

EPIC-02: Lesson and Time Slot Management - 5 of 9 stories selected (56%)

User Story ID	User Story (short)	Story Points	Priority
US-17	Student books a lesson slot	8	High
US-16	View available time slots	5	High
US-19	Staff adjusts available slots	5	High
US-20	Assign instructor to session	3	Medium
US-18	View upcoming lesson schedule	3	Medium

EPIC-03: Payment Management and Verification (Notifications Management) - 4 of 7 stories selected (57%)

User Story ID	User Story (short)	Story Points	Priority
US-25	Upload payment slip	5	High
US-26	Staff verifies payment slip	5	High
US-29	Notify student on date updates	5	High
US-30	Notify staff on slip upload	3	Medium

EPIC-04: Exam Management - 3 of 5 stories selected (60%)

User Story ID	User Story (short)	Story Points	Priority
US-33	Attempt practice quiz questions	5	High
US-36	Manage exam question bank	5	Medium
US-34	Filter quiz by vehicle category	3	Medium

Sprint 1 Summary

Epic	Selected / Total Stories	% of Epic Covered	Total Story Points
EPIC-01	9 / 15	60%	39
EPIC-02	5 / 9	56%	24
EPIC-03	4 / 7	57%	18
EPIC-04	3 / 5	60%	13
Total	21 / 36	58%	

12. Software and Hardware Requirements

Software Requirements

Category	Tool/Technology
Frontend	HTML, CSS, JavaScript, React.js (or similar framework)
Backend	Node.js with Express.js (or PHP/Laravel, depending on your group's preference)
Database	MySQL / MongoDB
IDE / Code Editor	Visual Studio Code
Version Control	Git, GitHub
Design & Prototyping	Figma (UI/UX mockups), Draw.io (system diagrams, ER diagrams)
Project Management	Trello / Jira (sprint & backlog tracking)
API Testing	Postman
Documentation	Microsoft Word, Google Docs
Browser (Testing)	Google Chrome, Mozilla Firefox

Hardware Requirements

Category	Specification
Development Laptop/PC	Minimum Intel i5 (8th Gen) / Ryzen 5, 8GB RAM (16GB recommended), 256GB SSD
Testing Device	Smartphone with a modern browser (for responsive testing)
Internet Connection	Stable broadband connection for cloud database/hosting access
Server (Deployment)	Cloud-hosted virtual server (e.g., shared hosting or a free-tier cloud instance) — no dedicated physical server needed for a student project

13. Budget

Item	Description	Estimated Cost (LKR)
Development Software	React, Node.js, MySQL, VS Code, Git — all free/open-source	0
Design Tools	Figma (free tier), Draw.io (free)	0
Domain Name	.com or .lk domain (1 year, optional for demo)	3,500
Web Hosting	Basic shared hosting or free-tier cloud hosting (e.g., Render, Vercel free tier) for demo purposes	0 – 5,000
Database Hosting	Free-tier cloud database (e.g., MongoDB Atlas free tier)	0
Third-Party APIs	None required for core functionality (no payment gateway API, since payments are verified manually via slip upload)	0
Hardware	Personal laptops already owned by team members	0
Miscellaneous	Printing, binding of report, presentation materials	2,000
Total Estimated Cost		5,500 – 10,500
